## 12th Annual Gene Therapy Symposium for Heart, Lung, and Blood Diseases

### Grant Award Details

---

12th Annual Gene Therapy Symposium for Heart, Lung, and Blood Diseases

**Grant Type:** Conference

**Grant Number:** CG1-07538

**Project Objective:** The Annual Gene Therapy Symposium for Heart, Lung, and Blood Diseases is organized to ensure that investigators and trainees in regenerative medicine and gene/cell-based therapy that do not have an opportunity to interact in other venues are able to meet, discuss, and identify common areas of research interest, network, and form new collaborations. The intent is to advance current research approaches in the regenerative medicine field, and to overcome obstacles that limit new treatments from becoming a clinical reality.

**Investigator:**

<b>Name:</b>	Alice Tarantal
<b>Institution:</b>	University of California, Davis
<b>Type:</b>	PI

---

**Award Value:** \$8,000

**Status:** Closed
